## Female suicide bomber carried out attack-Govt. Analyst

**By Franklin R. Satyapalan**

In a significant breakthrough into the assassination of Opposition Leader and UNP Presidential candidate, it has now been conclusively established by the Government Analyst that the attack was carried out by a woman suicide bomber.

It is for the police investigators to track down the culprits behind this assassination. We only provide the expert analysis to assist them, Government Analyst department sources said.

The department is still to confirm the

type of high explosive used in the bomb attack. It is to be established whether it was RDX, Semtex or some other kind of explosives the source said.

The piece of denim cloth believed to be remnants of an explosive packed jacket could not be identified with any group or movement with certainty, the sources said.

Another aspect we have to confirm is whether there was any cyanide in the body of this woman and the capsule found at the place of the bomb attack, they said.
